**Strategies Group Inc. Now Offering Sage Project Lifecycle Management Software**

**Suwanee, GA – August 31, 2009** – *Strategies Group Inc.* has been selected and authorized by Sage, located in Beaverton Oregon, to sell Sage Project Lifecycle Management Software. Sage Project Lifecycle Management is a comprehensive, Web-based collaborative platform that greatly simplifies your overall workflow by making all project-related information and documentation available online in a secure, centralized location. Sage Project Lifecycle Management acts as a central hub for all your projects so your building team can collectively view, edit, and manage project documents to carry out project plans faster, and with more accuracy.

“Sage Project Lifecycle Management is a perfect fit for our construction real estate software portfolio. It is the next generation of project collaboration software and its reasonable price point will help it gain acceptance in the CRE marketplace which has been hit hard by the economy. It is the leading web based project collaboration product in Europe and because it is an SAAS based customizable solution, we believe it will quickly become the market leader in the United States as well.” said Craig Trussell, V.P. of Sales and Marketing at Strategies Group Inc.

Strategies Group, a Premier Sage Reseller Partner and Authorized Sage Training Center has been the recipient of the prestigious Sage Software Million Dollar Club and President’s Circle awards for five consecutive years. We look forward to providing our clients with another cutting edge technology solution that will help them grow their businesses and become even more successful.
