

Sage Timberline Office 9.8 preview

It's all about getting your business management software to work harder for you. The key is quicker and easier access to the information you need so you can make better, well informed decisions, reduce risk and improve your bottom line.

Sage Timberline Office is gearing up for its next release (scheduled availability of Fall of 2011).

Here's a brief preview of some of the improvements to expect:

- Enhancements supporting:
 - Credit card management (Provides ability to enter and distribute credit card receipts as well as reconcile credit card statements).
 - Workforce management (Over 70 customizable HR forms, prefilled from Payroll, to help new hire, probation and termination documentation requirements).

- Performance improvements so you can save time and be more efficient. Some of the areas improved will be:
 - Application and Task startup
 - Closing Report and Inquiry Manager
 - Field Reporting in Project Management
 - Security administration and workstation installation

- Usability developments in the following:
 - Live support chat link
 - Integration between Estimating, Project Management and Job Cost
 - Server migration wizard
 - Change Request security (when updating an estimate)
 - Auto-file and page reduction of journals
 - Persisting inquiry file types

Watch your customer eNewsletter for more details as we get closer to the release. In the meantime, if you have questions, call your Sage Account Manager at: 800-858-7095.
