Strategies Group Inc. and Estimating Consultants LLC. Announce Strategic Partnership to Deliver Top Tier Support to Users of Sage Timberline Estimating.

Suwanee, GA – October 24, 2011 – *Strategies Group, Inc.*, a premier Sage Software business partner and Estimating Consultants, LLC, a Pre-Construction Consulting firm announce a strategic partnership to deliver comprehensive affordable technical support for users of Sage Timberline Estimating and related Pre-Construction software.

Strategies Group's new Client Care for Estimating support plan provides comprehensive service and support to organizations and individual end users of Sage Timberline Estimating.

"Estimators tell us that they don't need support very often but when they do they want to talk with someone that truly understands their job and that can help them with the process not just the tool" says Ted O'Shea, COO for Strategies Group. "Estimators are very smart people with very little time and an awful lot of stress to produce more, faster & accurate Estimates with slimmer contingencies. They need help applying their tools to their way of doing things so they can meet their goals while maximizing profitability."

Ted Merrill, Principal Consultant adds "What's different and unique about our support plan is that our people possess in depth how-to product knowledge of Sage Timberline Estimating that goes above and beyond what helpdesk technicians can offer. Our people are real Estimators with extensive knowledge of the entire pre-construction process. They have years of industry experience using the software to actually bid & win jobs. You will never speak to someone who hasn't actually been there & done that."

The new alliance between Strategies Group, Inc and Estimating Consultants LLC will provide a level of support to clients' that is normally unavailable through traditional help desks. "Our support doesn't stop if the software's label doesn't say "Sage" on it. We realize our clients use other popular, related software for Electronic Takeoff, Digitizers, Cut & Fill and more and it's our goal to support the process not just the product" explains Ted Merrill.
